## Energy Management Energy Meter Type EM330

- Easy connection or wrong current direction detection
- Certified according to MID Directive (option PF only): see "how to order" below
- Compliant with the international accuracy standard IEC/EN62053-21, and the IEC/EN61557-12 performance requirements (active power and active energy).
- Other versions available (not certified, option X): see "how to order" on the next page

- Three phase energy meter
- · Class 1 (kWh) according to EN62053-21
- Class B (kWh) according to EN50470-3
- Accuracy ±0.5% RDG (current/voltage)
- Current measurement via CT
- Backlit LCD display (3x 8-digit) with integrated touch key-pad
- · Energy readout on display: 8 digit
- · Variable readout on display: 4 digit
- Energy measurement: kWh and kvarh (imported/ exported); kWh+ by 2 tariffs; kWh per phase
- System variables: kW, kvar, kVA, VLL, VLN, PF, Hz, kWdmd, kWdmd peak
- Phase variables: kW, kvar, kVA, VLL, VLN, A, PF
- Auxiliary power supply
- Dimensions: 3-DIN module
- Protection degree (front): IP51
- Pulse output (optional, by open collector PNP)
- RS485 Modbus port (optional)
- M-Bus port (optional)
- Run hour meter
- Neutral current calculation
- · Digital input (for tariff management)

#### **Product description**

Three-phase energy meter with backlit LCD display with integrated touch keypad. Particularly indicated for active energy metering and for cost

allocation (CT connection), with dual tariff management availability. It can measure imported and exported energy or be programmed to consider only the imported one. Housing for DIN-rail mounting, with IP51 front degree protection. The meter is optionally provided with pulse output proportional to the active energy being measured, RS485 Modbus port or M-Bus port. Available for legal metrology (PF option, only for imported energy).

Certified according to MID Directive, Module B and Module D of Annex II, for legal metrology relevant to active electrical energy meters (see Annex V, MI003, of MID). Can be used for fiscal (legal) metrology.

How to order FM330 DIN AV5 3 H O1 PF R

#### **Type Selection**

#### Range code **System** Power supply Output AV5: 400 VLL AC - 5(6)A 3-phase, 3 or 4 wire H: auxiliary power supply 01: pulse output 90 to 260 V ac/dc (CT connection) **S1**: RS485 Modbus port M1: M-Bus port

#### Option

**PF:** Certified according to MID Directive. Can be used for fiscal (legal) metrology.

#### Measurement

Measurement -

- **A:** The power is always integrated (both in case of positive imported and negative exported power) and the total energy meter is certified according to MID.
- **B:** Only the total positive energy meter is certified according to MID.

## STANDARD

Not certified according to MID Directive. Cannot be used for fiscal (legal) metrology.

####

Memory	
Energy Programming parameters	10^12 cycles. Energy value is saved every time the less significant digit increases. 10^12 cycles. When a parameter is modified, only the relevant memory cell is overwritten
LEDs	
Flashing red light pulses	Proportional to the product of the CT and VT ratios
Weight (pulses/kWh) 1	> 700,1 (CT x VT)
Weight (pulses/kWh) 10	70.1-700 (CT x VT)
Weight (pulses/kWh) 100	7.1-70 (CT x VT)
Weight (pulses/kWh) 1000	< 7.1 (CT x VT)
Duration	90ms
Fix orange light	wrong current direction (only with PFB option or with "B" measurement selection in case of X option)
Current overloads	
Continuous For 500ms	6A, @ 50Hz 5 In
Voltage Overloads	1 2 Un
Continuous For 500ms	1.2 Un 2 Un
Input impedance 230VL-N	1.2 Mohm
5(6) A	< 0.072 VA per channel
Wrong connection detection  Phase sequence  Correct current direction	Installation guide to indicate if connections are correctly carried out. Can be disabled. Indicates if the phase sequence is not the correct one (L1-L2-L3) Indicates if the current direction is not the right one (only with PFB option or with type "B" measurement selection in case of X option).

#### Input specifications (cont.)

Load conditions The wrong connection detection works in case of loads with:

- PF>0.766 (<40°) if inductive or PF>0.996 (<5°)

if capacitive

- a current at least equal to 10% rated current in every measuring interval the single phase

energies with positive sign

are summed to increase the total postive energy totalizer (kWh+), while the others increase the total negative totalizer (kWh-).

P L1= +2kW, P L2 = +2kW,

P L3 = -3 kW

Integration time = 1 hour +kWh = (2+2) x1h = 4 kWh

 $-kWh = 3 \times 1h = 3kWh$

Info 5	Secondary address (M1)	M-Bus secondary address

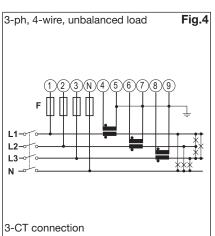

### Wiring diagrams

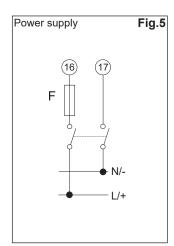

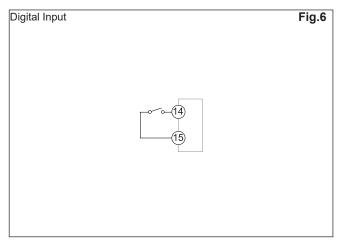

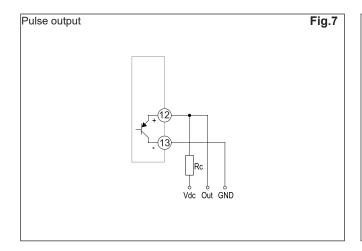

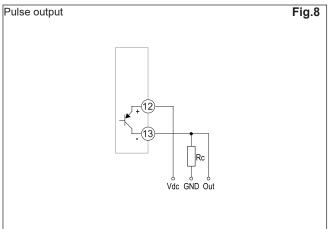

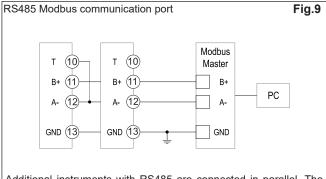

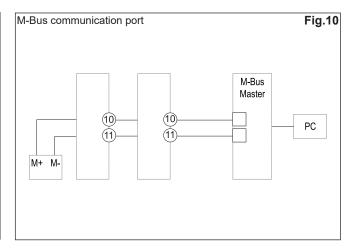

#### Wiring diagrams (cont.)

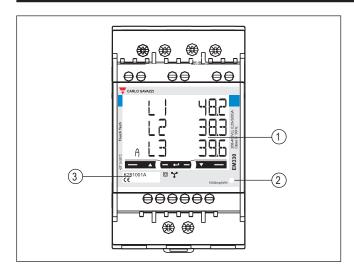

Additional instruments with RS485 are connected in parallel. The serial output must only be terminated on the last network device connecting terminals A- and T. For connections longer than 1000 m use a signal repeater. Maximum 247 transceivers on the same bus.
